THINKING AND ANALYSIS

Chapter outlines

THINKING AND ANALYSIS

1. Patterns of thought
2. Creative Thinking Skills

LEARNING OBJECTIVES

By the end of this section, you will be able to:

- Identify different patterns of thought, such as those found in Bloom's taxonomy
- Discuss the relationship of each thought pattern to education
- Define creative thinking
- Identify the value of creative thinking in education
- Describe the impact of limitations (such as rules) on creative thinking

1. Patterns of thought

What Is Thought?

“We exist, and we are aware that we exist, because we think. Without thought or the ability to think, we don’t exist.”

What Is Thought?

- **Thinking** is the mental process you use to form associations and models of the world. When you think, you manipulate information to form concepts, to engage in problem-solving, to reason, and to make decisions.
- **Thought** can be described as the act of thinking that produces thoughts, which arise as ideas, images, sounds, or even emotions.

“Cogito ergo sum.” = “I think, therefore I am.”

(philosopher René Descartes, French, the early 1600s)

What Are Learning Objectives?

Learning objectives are *goals* that specify what someone will know, care about, or be able to do as a result of a learning experience.

The learning skills can be divided into three main categories or “domains”:

- **Cognitive domain** (*what you should know*),
- **Affective domain** (*what you should care about*)
- **Psychomotor domain** (*what you should be able to do*)

The
Cognitive
Domain of
Learning

The New Version of Bloom's Taxonomy

Essential Public Speaking Skills

Use both verbal and nonverbal strategies to effectively communicate with your audience.

Verbal

Unleash the power of your voice to effectively communicate.

Record yourself and ask a friend for feedback. Incorporate these qualities:

Proper Loudness

Make your voice have appropriate power, intensity and projection.

Good Voice Quality

Avoid being breathy, strident, harsh, or nasally.

Correct Pronunciation

Pay attention to your sound production, rhythm and cadence.

Be Articulate

Form distinct sounds so every word is clear and deliberate.

Sensible Rate

Align speed to the speeches purpose: fast if exciting, slow for sad and ~160 words/minute if informative.

Be Expressive

Emphasize each phrase with the right pitch, pace, pause and power.

Dynamic Energy

Amplify and intensify points to show passion and compassion for the people it affects.

Nonverbal

Leverage body language to communicate beyond words.

Rehearse in a mirror or record yourself. Look for these qualities in your body language:

Engaging Eye Contact

Avoid staring down your audience or reading directly from your notes.

Natural Gestures

Use supportive hand gestures but don't force anything.

Facially Aware

Make natural and deliberate facial expressions.

Purposeful Movement

Be intentional with every move, shift, pace and hair and clothing adjustments.

Professional Appearance

Be inspection-ready and represent your organization appropriately.

Remember, the impression you make on your audience is:

What you see or feel
What you hear
Words

KĨ NĂNG DIỄN THUYẾT TRƯỚC ĐÁM ĐÔNG

Sử dụng cả chiến lược lời nói và ngôn ngữ hình thể để tương tác hiệu quả với khán giả của bạn.

Lời nói

Phát huy sức mạnh của giọng nói để giao tiếp hiệu quả

Ghi âm bản thuyết trình của bạn và nhờ bạn bè đưa ra đánh giá. Hãy tích hợp những yếu tố sau.

Độ lớn giọng nói

Làm cho giọng nói của bạn có sức mạnh, cường độ, và phát ra ở mức phù hợp.

Chất lượng giọng nói tốt

Tránh làm giọng nói của bạn đầy khí hờ hững, cứng nhắc, khó nghe hoặc có âm mũi.

Phát âm đúng

Hãy chú ý đến âm thanh, nhịp điệu và lối phát âm của bạn.

Hãy rõ ràng

Tạo ra các âm thanh rõ ràng để mỗi từ đều được phát âm rõ ràng và có chú ý.

Tốc độ phát biểu hợp lý

Điều chỉnh tốc độ phù hợp với mục đích của bài phát biểu: nhanh nếu phần thú vị, chậm nếu phần buồn và 160 từ/phút nếu phần trình bày nhiều thông tin.

Thể hiện sự cảm xúc

Nhấn mạnh mỗi cụm từ với âm điệu, tốc độ, dừng và sức mạnh phù hợp.

Năng lượng sôi động

Khuếch đại và tăng cường điểm nhấn để thể hiện đam mê và sự thông cảm đối với những người bị ảnh hưởng.

Ngôn ngữ hình thể

Tận dụng ngôn ngữ cơ thể để giao tiếp vượt qua ngôn từ

Tập luyện trước gương hoặc ghi âm lại bản thuyết trình của mình. Lưu ý những yếu tố sau trong ngôn ngữ cơ thể của bạn.

Tiếp xúc mắt thu hút sự chú ý

Tránh nhìn chằm chằm vào khán giả hoặc đọc trực tiếp từ ghi chú.

Cử chỉ tự nhiên

Sử dụng các cử chỉ tay hỗ trợ nhưng đừng ép buộc bất cứ điều gì.

Nhận diện khuôn mặt

Làm cho biểu cảm khuôn mặt tự nhiên và có chủ đích.

Chuyển động có mục đích

Ý thức với mỗi động tác, thay đổi, tốc độ, chỉnh sửa tốc và quán đo cho phù hợp.

Về bề ngoài chuyên nghiệp

Sẵn sàng để kiểm tra và đại diện cho tổ chức của bạn một cách phù hợp.

Hãy nhớ rằng, ấn tượng mà bạn tạo ra với khán giả của mình là:

Những gì bạn thấy hoặc cảm nhận
Những gì bạn nghe
Những từ mà bạn nói

DESCRIPTIONS OF THE BLOOM'S TAXONOMY - THE COGNITIVE DOMAIN

MAIN SKILL LEVELS	DESCRIPTION
Remembering	When you are skilled in remembering, you can recognize or recall knowledge you've already gained, and you can use it to produce or retrieve or recite definitions, facts, and lists.
Understanding	Understanding is the ability to grasp or construct meaning from oral, written, and graphic messages.
Applying	When you apply, you use learned material (or you implement the material) in new and concrete situations.

DESCRIPTIONS OF THE BLOOM'S TAXONOMY - THE COGNITIVE DOMAIN

MAIN SKILL LEVELS	DESCRIPTION
Analyzing	When you analyze, you have the ability to break down or distinguish the parts of material into its components, so that its organizational structure may be better understood.
Evaluating	With skills in evaluating, you are able to judge, check, and even critique the value of material for a given purpose.
Creating	With skills in creating, you are able to put parts together to form a coherent or unique new whole. You can reorganize elements into a new pattern or structure through generating, planning, or producing.

2. Creative Thinking Skills

“Everybody has a creative potential and from the moment you can express this creative potential, **you can start changing the world.”**

Paulo Coelho, author and lyricist

Creative Thinking

- **Everyone has creative abilities.** It's true of everyone who fully expresses creative abilities as well as those who express them very little or not at all.
- **All humans are innately creative**, especially if creativity is understood as a problem-solving skill.
- **Creativity is inspired when there is a problem to solve.** As a creative thinker, you are curious, optimistic, and imaginative.

Creativity is inspired when there is a problem to solve. Considered as an act of problem-solving, creativity can be understood as a ***skill***—as opposed to an inborn talent or natural “gift”—that ***can be taught as well as learned.***

ACTIVITY: ASSESS YOUR CREATIVE PROBLEM-SOLVING SKILLS

Objective

- Evaluate your attitude toward problem-solving in the context of cultivating creative thinking.

Directions:

- Access *Psychology Today's* [Creative Problem-Solving Test](#) at the *Psychology Today* Web site.
- Read the introductory text, which explains how creativity is linked to fundamental qualities of thinking, such as flexibility and tolerance of ambiguity.
- Then advance to the questions by clicking on the “Take The Test” button. The test has 20 questions and will take roughly 10 minutes.
- After finishing the test, you will receive a Snapshot Report with an introduction, a graph, and a personalized interpretation for one of your test scores.
- Complete any further steps by following your instructor's directions.

Creative Thinking in Education

College is great ground for enhancing creative thinking skills.

These are some college activities that can stimulate creative thinking. Are any familiar to you?

- Design sample exam questions to test your knowledge as you study for a final.
- Devise a social media strategy for a club on campus.
- Propose an education plan for a major you are designing for yourself.
- Prepare a speech that you will give in a debate in your course.
- Develop a pattern for a costume in a theatrical production.
- Arrange audience seats in your classroom to maximize attention during your presentation.
- Arrange an eye-catching holiday display in your dormitory or apartment building.

Creative Thinking in Education

College is great ground for enhancing creative thinking skills. These are some college activities that can stimulate creative thinking. Are any familiar to you?

- Participate in a brainstorming session with your fellow musicians on how you will collaborate to write a musical composition.
- Draft a script for a video production that will be shown to several college administrators.
- Compose a set of requests and recommendations for a campus office to improve its customer service.
- Develop a marketing pitch for a mock business you are developing.
- Develop a comprehensive energy-reduction plan for your cohousing arrangement.

How to Stimulate Creative Thinking

- 1. Sleep on it.** Over the years, researchers have found that the REM sleep cycle boosts our creativity and problem-solving abilities, providing us with innovative ideas or answers to vexing dilemmas when we awaken. **Keep a pen and paper by the bed** so you can write down your nocturnal insights if they wake you up.
- 2. Go for a run or hit the gym.** Studies indicate that exercise stimulates creative thinking, and the brainpower boost lasts for a few hours.
- 3. Allow your mind to wander a few times every day.** Far from being a waste of time, daydreaming has been found to be an essential part of generating new ideas. If you're stuck on a problem or creatively blocked, think about something else for a while.

How to Stimulate Creative Thinking

- 4. Keep learning.** Studying something far removed from your area of expertise is especially effective in helping you think in new ways.
- 5. Put yourself in nerve-racking situations** once in a while to fire up your brain. Fear and frustration can trigger innovative thinking.
- 6. Keep a notebook with you** so you always have a way to record fleeting thoughts. They're sometimes the best ideas of all.

ACTIVITY: 2

Building on others' ideas: Creative thinking in group communication involves building on and expanding upon the ideas shared by other group members. By actively listening, acknowledging and valuing diverse perspectives, and using techniques like "yes, and..." instead of "yes, but...", group members can enhance creative thinking and collaborative ideation.

A Brainstorm of Tips for Creative Thinking

The best way to have a good idea is to have lots of ideas.

—Linus Pauling, double Nobel Laureate, chemist, biochemist, and peace campaigner

A Brainstorm of Tips for Creative Thinking

SENSING

- **Use all your senses** - see, taste, smell, touch, hear, think, speak.
- **Be a good observer** of people, nature, and events around you.

THINKING

- **Engage thinking** on the right side of your brain (intuition, open-mindedness, visual perception, rhythm . . .).
- **Change your interpretation** of an event, situation, behavior, person, or object.
- **Allow ideas to incubate.**
- **Be open** to insight as ideas pop into your mind.

A Brainstorm of Tips for Creative Thinking

IMAGINING

- Brainstorm by generating ideas with a group of people.
- Ask, “What would happen if . . .”
- Ask, “In how many different ways . . .”
- Develop ideas and expand their possibilities.
- Envision the future.

A Brainstorm of Tips for Creative Thinking

SPEAKING AND WRITING

- Use your words and your “voice” when conveying your original ideas.
- Avoid using clichés or overly familiar responses to questions or problems.
- Explain how your ideas move beyond the status quo and contribute to a discussion.
- Take notes.

A Brainstorm of Tips for Creative Thinking

DRAWING

- Use mind-mapping to capture ideas; start with a key concept and write it in the center of your page; use connecting lines, radiating from the central concept, and write down any connected or related ideas that come to you.
- Create pictures or drawings of situations (“rich pictures”) to show them in a different way.

A Brainstorm of Tips for Creative Thinking

LEARNING

Find ways to demonstrate your personal investment in projects.

Gather knowledge and conduct research.

Have more fun learning!

MOVING

Do physical activities to engage the creative areas of your brain and think differently.

RESTING

Take breaks.

The background is a collage of puzzle pieces in shades of grey and teal. Several puzzle pieces feature a large black question mark. In the center, a puzzle piece displays a blue line drawing of a lit lightbulb with radiating lines. The text "Creative Thinking" is centered in white, sans-serif font.

Creative Thinking

Fiction and Facts

Creative Thinking - Fiction and Facts

FICTION

- Every problem has only one solution (or one right answer).

FACTS

- Most problems can be solved in any number of ways.
- If you discover a solution that works, it's a good solution.
- Other people may think up solutions that differ from yours, but that doesn't make your solution wrong or unimportant.

Creative Thinking - Fiction and Facts

FICTION

- The best answer or solution or method has already been discovered.

FACTS

- Look at the history of any solution and you'll see that improvements, new solutions, and new right answers are always being found.
- The ox or horse, the cart, the wagon, the train, the car, the airplane, the jet, the space shuttle? What is the best and last?

Creative Thinking - Fiction and Facts

FICTION

- Creative answers are technologically complex.

FACTS

- Only a few problems require complex technological solutions.
- Most problems you'll encounter need only a thoughtful solution involving personal action and perhaps a few simple tools.
- Even many problems that seem to require technology can be addressed in other ways.

Creative Thinking - Fiction and Facts

FICTION

- Ideas either come or they don't. Nothing will help - certainly not structure.

FACTS

- There are many successful techniques for generating ideas. One important technique is to include structure.
- Create guidelines, limiting parameters, and concrete goals for yourself that stimulate and shape your creativity.

FPT UNIVERSITY

THINKING AND ANALYSIS (cont.)

Chapter outlines

THINKING AND ANALYSIS

2. Creative Thinking Skills (cont.)

LEARNING OBJECTIVES

By the end of this section, you will be able to:

- Describe the role of creative thinking skills in problem-solving
- Identify technology tools that enhance our learning
- Explain how technology skills relate to critical/creative thinking skills
- Examine online learning in the context of organizing, communicating, reading, and researching online
- Assess our readiness to use technology

Problem-Solving with Creative Thinking

- Creative problem-solving is a type of problem-solving. It involves searching for new and novel solutions to problems.
- Unlike critical thinking, which scrutinizes assumptions and uses reasoning, creative thinking is about generating alternative ideas - practices and solutions that are unique and effective.
- It's about facing sometimes muddy and unclear problems and seeing how "things" can be done differently - how new solutions can be imagined.

Project start up "Social initiative":

Discuss in small groups, propose a creative social initiative, to solve any problem our society.

Rules of Brainstorming

Defer Judgment

Encourage Wild Ideas

Build on the Ideas of Others

Stay Focused on the Topic

One Conversation at a Time

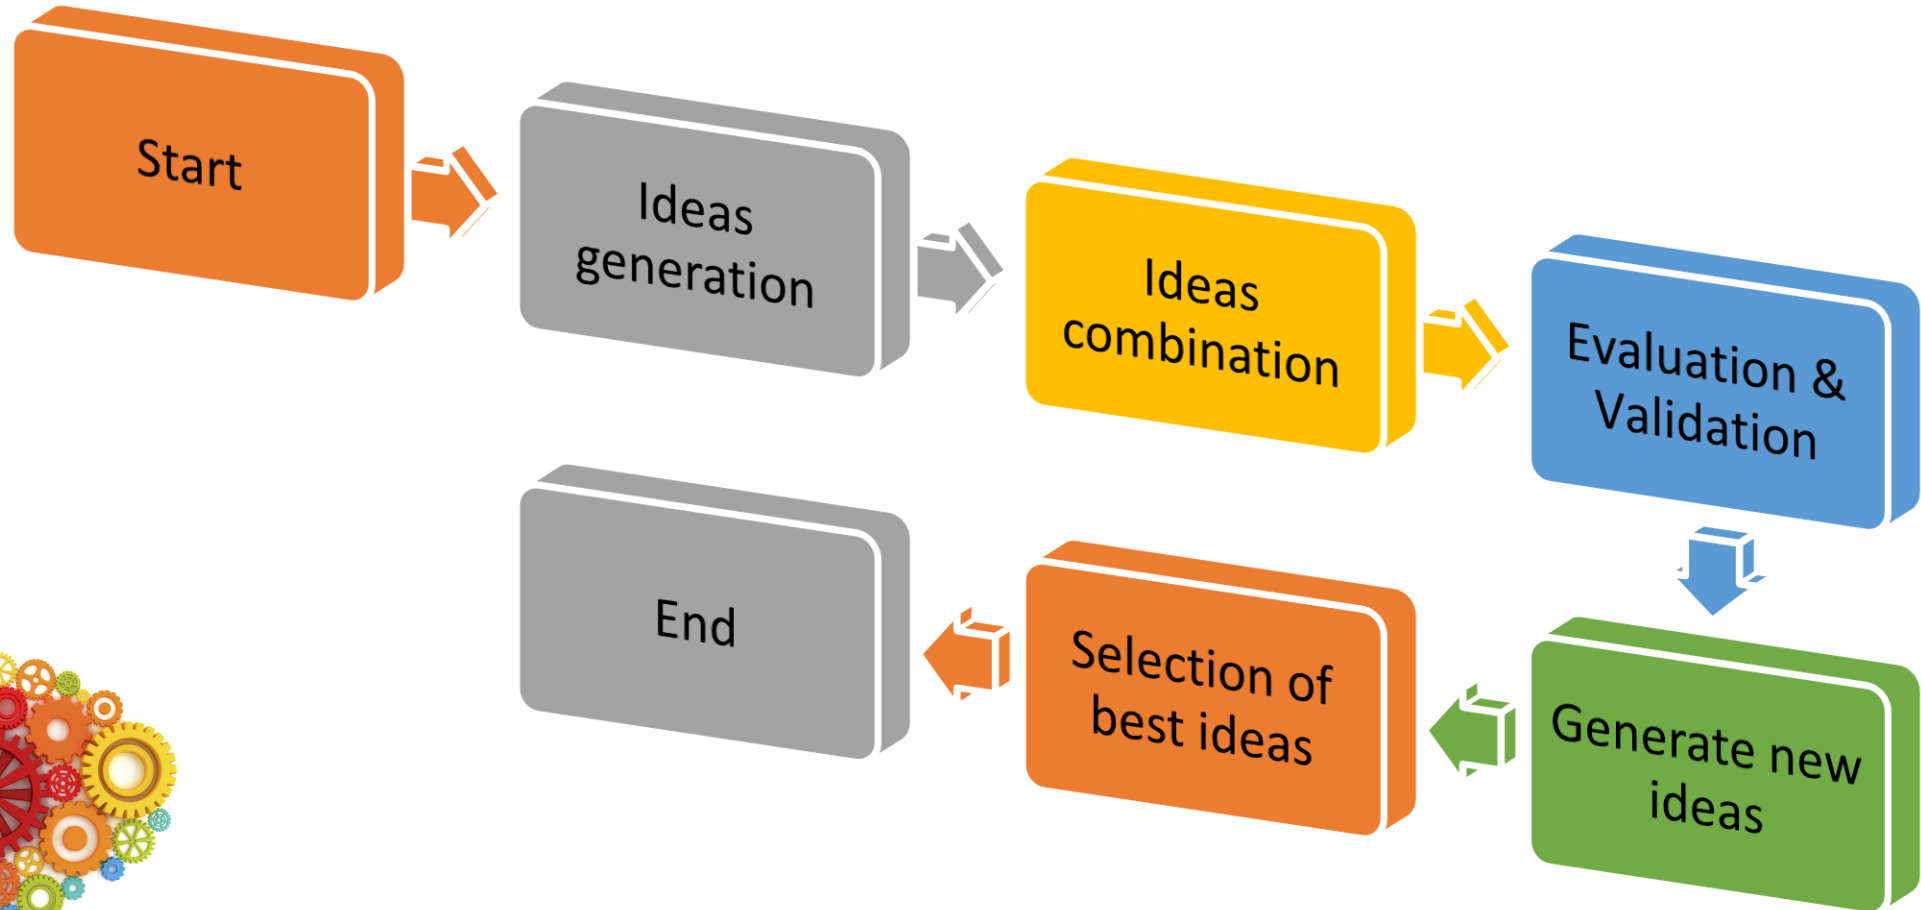

Be Visual

Go for Quantity

Brainstorming technique

it's
Q&A
TIME!
